

RUCRT

Rutgers Combat Robotics Team

Sponsorship Information Packet

2026-2027

A group of approximately 15 team members, mostly young adults, are posed in two rows. They are wearing dark t-shirts with a small red logo. Behind them is a large, glowing blue and white 'NH' logo, likely representing Rutgers University. The background is dark, making the logo and the team stand out.

WHO WE ARE

We are the Rutgers University Combat Robotics Team, officially partnered with the Rutgers Institute of Electrical and Electronics Engineering. Our plan is to compete in both the National Havoc Robot League and the Garden State Combat Robotics League. Our team currently consists of 70+ dedicated engineers, computer scientists, and other professionals. Currently, we design and build 3lb combat robots to compete against other teams' robots in a 3-minute battle.

Our business subdivision drives our social media and company outreach, building our community, and sharing our love robots. Our technical roadmap includes expanding into higher weight classes and fielding multiple robots at once, along with creating workshops to help educate our newer members on how to create robots — building a pipeline of engineers who can carry the team forward for years to come.

WHAT WE STRIVE FOR

The Rutgers Combat Robotics Team was founded as a club in 2024 and it has grown from a small group of independent thinkers to a successful organization that is committed to advance in the field of robotics. As a club we believe in promoting learning, advancement and awareness about robotics.

The members in our organization are encouraged to explore different avenues of robotics. We want to raise more awareness about the highly advanced technology that is used to create robots and our members want to challenge ourselves to compete in competitive robotics competitions across different countries.

SPONSORSHIP TIERS

Benefits	Bronze (\$100+)	Silver (\$250+)	Gold (\$500+)	Platinum (\$1,000+)	Diamond (\$2000+)
